Hi Des

S/RES/24/0923 | Erection of 134 dwellings and provision of public open space with associated infrastructure and earthworks (layout, scale, appearance and landscaping) - Reserved Matters from previous outline permission S/OUT/13/1555. | Land At Parcels R8 And R9 (East And West Of Old Vicarage Lane) Land North Of A420 New Eastern Villages, South Marston Swindon

SUMMARY

The information submitted is not acceptable in its current format.

The **LEAMP** (fpcr, August 2024 FINAL) highlights under Section 2 **"Ecological Receptors"** for Birds, Reptiles, GCN and Bats a statement *"….will result in additional enhancements for local amphibian populations…will provide birds with new foraging and nesting opportunities… will provide birds new foraging and opportunities for a range of bats species….* It concludes with the Summary **Paragraph/Section 2.5** *Post development green infrastructure will provide enhancements to a range of species.*

Also, the **Design & Access Statement,** ***P 40 Resources and Sustainability Landscape Strategy***, it states that; *Ecological enhancements to include log piles or hibernacula located on the margins of grassland and scrub, bird and bat boxes positioned on existing mature trees to the site boundaries; and a bug hotel will also be created within the public open space.*

However, further specific detail is required (i.e. been omitted) in relation to the above by way of number of bat and bird boxes (bar Swift boxes that has been addressed), their type, (including proposed target species) and (tree) locations and orientations. What, if any, are the specific additional enhancements in relation to amphibians and reptiles? The LEAMP should be updated

to address the above.

4.5 Landscape Measures states *"…After construction, the Green Infrastructure will be handed over to a Management Company or other appropriate body…"* I would like to see a commitment statement that any management company utilises the expertise of a Suitbaly Qualified Ecologist (SQE) for the site long-term, in order to help deliver, maintain and monitor the ecological receptors and wider ecological and landscape proposals as set out in the LEAMP and FLEAMP (agreed and part of S/COND/22/0316). Again, the LEAMP should be revised to address the above.

Kind regards,

Andrew
