dear sirs

I comment on the expansion of South Marston S/OUT/13/1555. We viewed the proposal last week at the village hall.

It seems it is only proposals, nothing on the drawings is "cast in stone", which having worked in and around development all of my life immediately lead to the items with considerable cost to the developer and a drain on their profit.

The village is having this development thrust on them, most would like to avoid it, but it is a fact of life.

Therefore the disruption to the village should be minimal. The immediate items I can see that will not happen or will be changed are

a] the areas of land to be signed to the village, at previous proposals areas were designated non developed areas, in my experience in never get signed in total, and if any does it is those's which cannot or difficult to develop, those which are retained are at some time resubmitted; it becomes a bonus.

b] the same applies to sheltered or other construction, lets establish now that the demand is require, and if so the planning require it to be undertaken while a substantial of commercial is not commenced.

c] the extra access onto the A420 is constructed before more than 20% of the Roborough village is commenced, this for two reasons.

1] that the access cannot be forgotten or otherwise manipulated out of the scheme.

2] the village will take unreasonable disruption from the construction process, once again a fact of life, but with the new access all traffic is taken through that entrance/exit, if it's agreed as a planning condition, the sooner it is there the better, the wails of anguish will be great from the land owners and developers but the sums of money involved will make it possible.

the early alterations to the existing access will not suffice as that will be used in the construction element of the development.

These ground rules need establishing at the outset, otherwise we have all lost again, it makes no difference to you in your offices or appear on your CV's but we have to live with the consequences, the developers will not walk away from the deal, and if they should you will not hear the village crying.

sincerely

chris case
