Hi Harriet

Thankyou for sending these submissions on - we have now looked at the details of these on the portal.

We received no notification about these Condition 42 discharge applications via the weekly lists, so were unaware that they had been submitted. We don't understand why this doesn't happen automatically.

I wonder if we could ask you and Ed to always notify us directly of receipt of such Condition Discharge submissions, as we endeavour to respond to everything (even if it is no comment). As you can see below, we are picking up some important issues here that we otherwise would not have been able to highlight.

S/COND/25/0308 Vistry 6/7

Under S/RES/24/0947, submitted in February 2025, the drainage proposal showed the houses fronting OVL will all drain towards OVL ditch because levels are insufficient to drain west to the main SUDs network, as was originally in the Surface Water Drainage Strategy. Capacity of the OVL roadside ditch is therefore critical since it currently overtops surface water onto Old Vicarage Lane (ref SMPC Flood Report). On 28th April, the LLFA responded, and wasn't happy, quoting a list of information they still required.

Under **S/COND/25/0308,** the Condition 42 requirements are again submitted, but there is no further or revised documentation responding to the request from the LLFA, nor any indication that the LLFA is recommending approval, nor any mention of eg increasing the capacity of the roadside ditch. Is this a case of the portal not showing up to date information, or has the LLFA just changed its mind?

S/COND/25/0450 Taylor Wimpey R8/9

Please note our previous comment on S/RES/24/0923 which covered the overall drainage strategy for parcel R8:

'Prevention of Flooding on the Bridleway: Thank you for providing the section plans across the bridleway. It is clear that section C-C is still a matter of concern since the slab levels of the housing to the north and south of it are both on much higher ground. We believe there is a surface water disposal pipe planned within this area, but there is no information on whether it is designed to be effective at preventing serious

flooding on the bridleway from west of C-C to its junction with Old Vicarage Lane. Clarification is required please!'

This issue has not been addressed in the latest application to discharge Condition 42. In fact, the latest engineering drawings provided no longer show the surface water disposal pipe mentioned above.

Separately, we have directly suggested to the developers that, as part of allowing temporary construction access from the bridleway at the relevant point, this end of the Bridleway needs building up, with a drainage channel or pipe constructed to get surface water into the OVL system, but we have had no response to date. This could provide a solution to the problem being identified.

We are about to submit a formal response via the portal for the contents of S/COND/25/0852.

Best wishes

Sylvia

Subject: Primary Street Drainage Condition

Good afternoon Colin and Sylvia,

I hope your well and it was nice to meet you the other day.

In light of topics raised at the meeting, in particular the queries relating to drainage and SUDS for the Primary Street, we wanted to make you aware that we do have a discharge of condition application which seeks to discharge the outline condition (42) relating to this matter. In review the LLFA are happy with the proposed and have recommended the condition be discharged. The reference number for this application is S/COND/25/0308, but please also find attached the relevant plans that have been submitted that relate to drainage and the link to this application on the council's public access: S/COND/25/0308

In terms of other drainage matters we also have applications; S/COND/25/0450 and S/COND/25/0308 which also seek to discharge Condition 42 (Drainage) and are still in review with the LLFA. The link for those applications are here;
S/COND/25/0450 : S/COND/25/0450 and S/COND/25/0308: S/COND/25/0308

Another topic raised was utilities and although I know the conversation related more to power, to make you aware we have also received a discharge of condition application in (ref: S/COND/25/0852) which relates to broadband in which the link can be found here; S/COND/25/0852

Kind regards,

Harriet Parker
