Dear Ed,

WOODLANDS, SWINDON NEV
RE: RESERVED MATTERS APPLICATION FOR SOUTH MARSTON PRIMARY STREET PURSUANT TO OUTLINE PLANNING PERMISSION S/OUT/13/1555/EDSN

On behalf of our client Vistry Cotswolds and Taylor Wimpey Southern Counties (VTW), we are pleased to submit to Swindon Borough Council a reserved matters application (RMA) pursuant to the outline planning permission S/OUT/13/1555/EDSN. The formal description of this reserved matters application is as follows:

> *Reserved Matters application (following planning application S/OUT/13/1555) for Land North of A420, Eastern Villages. Details of the layout, scale, appearance, access and landscaping in relation to the Primary Street connecting Old Vicarage Lane to Thornhill Road. Including details pursuant to conditions 11 (Landscape Ecology and Arboricultural Management Plan), 13 (Tree Protection), 17 (Bats), 31 (Movement Phasing Plan), 36 (Construction Method Statement), 37 (Construction Environmental Management Plan), 42 (Surface Water Drainage), 53 (Slab Levels), 54 (Materials), 56 (Street Lighting and Street Furniture.*

This application includes the following documentation submitted via the Planning Portal, under reference **PP-13252813:**

- Covering Letter
- 1796 South Marston Primary Street LEAMP
- 1796AA Primary Street Rev B
- 1796-ECO-CMS Primary Street
- 1335 RM1- Drainage Strategy v0.1 (004)
- 1796 Response to Landscape Officer Comments 30.07.24
- Drawings:

In addition to the documentation outlined above, which is subject to approval, the application also includes a context plan for the reserved matters application (ref: LHL006_226). This has been provided to demonstrate certain areas within the RMA red line where additional details (e.g. landscaping) are to come forward as part of future reserve matters applications.

Furthermore, a response to the Landscape Officer comments provided during the pre-application process has been submitted as part of this application to demonstrate how the comments have been addressed in the subsequent design of the primary street.

Context

Outline planning permission S/OUT/13/1555/EDSN, was approved by Swindon Borough Council on 11 August 2021, for a sustainable urban extension to the east of Swindon and north

of the A420. Following the approval of the outline planning permission a Non-Material Amendment (ref: S/AMEND/21/1881) was approved on 12 July 2024.

This reserved matters application follows the submission of the first infrastructure application, which was submitted to Swindon Borough Council on 10 May 2024, for a Foul Water Pumping Station (ref: S/RES/24/0551), which is pending determination.

Proposed Development

In summary, this RMA includes:

i. Construction of a primary street which will connect Old Vicarage Lane to Thornhill Road, and will serve as the future access to residential development; and

ii. Associated hard and soft landscaping, drainage, construction access, engineering operations and earthworks.

These items are detailed in the drawings which have been submitted as a part of this planning application.

Access

New vehicular routes are proposed as part of this development, which will connect the realigned Old Vicarage Lane to the new Thornhill Junction. The primary street will serve as the primary route of access to the residential areas of 'Marston Gate and Nightingale Corner' and 'Fairthorne and Thornhill', as well as providing a future connection to the secondary street and South Marston Community Hub.

Drainage

The proposed water drainage scheme has been designed to ensure that all drainage runs by gravity, according to adoptable standards, and will flow into catchment areas throughout the site, including swales, basins and under drained swales.

Landscaping

The proposed soft landscaping includes new tree planting along the primary street, with key gate way planting utilised at the entrances to the site. Woodland edge/scrub planting and woodland planting has been incorporated to the south of the western edge of the primary street (towards Thornhill Road). The proposed planting strategy for this application is in accordance with the planting plan within the Strategic Design Code.

Three types of grassland planting is also included in the proposed development, including a meadow mix, wildflowers for wetlands mix and an amenity grass mix. Where appropriate native species rich hedgerow planting has also been included.

Street lighting

Street lighting has been incorporated into the design, which functions alongside the landscaping proposed, maintaining a buffer between the lighting and tree planting.

DAVID LOCK ASSOCIATES

Conformity with the Outline Planning Permission

The table below explains how the application material has also been prepared to respond to the requirements of the conditions of the Outline Planning Permission:

Condition Number and Topic	Document Submitted and Response
Condition 11 *(Landscape Ecology and Arboricultural Management Plan)*	A LEAMP has been submitted as part of this RMA which provides details for the management of the area and habitats covered by the South Marston Primary Street, in accordance with the South Marston FLEAMP (ref: S/COND/22/0316).
Condition *13* *(Tree Protection)*	An Arboricultural Impact Assessment is included within the submitted documents, which demonstrates how retained trees shall be protected as part of the development proposed.
Condition *17* *(Bats)*	The submitted Ecological Method Statement, includes an assessment in relation to bats, and outlines how development shall be carried forward where bats are present.
Condition *31* *(Movement Phasing Plan)*	A movement phasing plan is currently being prepared and will be submitted as part of this application following validation. The Movement Phasing Plan will relate to the area covered by this reserved matters application, as well as application S/RES/24/0551.
Condition *36* *(Construction Method Statement)*	A construction method statement is currently being finalised and will be submitted as part of this application.
Condition *37* *(Construction Environmental Management Plan)*	The Ecological Method Statement submitted as part of this application is to be read in conjunction with the CMS, which together detail how the construction of the development will be managed to mitigate against effects on the environment and local amenity.
Condition *42* *(Surface Water Drainage)*	A Drainage Technical Note has been provided, which illustrates how the proposed development deals with surface water drainage.
Condition *53* *(Slab Levels)*	The submitted 'South Marston Primary Street Contours' and 'South Marston Primary Street Long-Section' outline the proposed levels of the works, including the slab levels anticipated as part of development.
Condition *54 (Materials)*	The 'South Marston Primary Street Road Finishes Plans' demonstrate the materials of the primary street, and the wider area which will comprise the proposed development.
Condition *56* *(Street Lighting and Street Furniture)*	The submitted 'General Arrangement' drawings include details relating to street lighting and street furniture.

In regard to condition 25 of the outline planning permission, sequencing details do not form part of this submission, as the primary street will be constructed as a single infrastructure project linking into the existing highway at either end and, therefore, it is not anticipated that turning facilities are required.

The application has been supported by the requisite fee (£2,605.00), paid via the Planning Portal.

We trust that these documents provided will ensure the validation of this planning application, however, if you require any further information, please do not hesitate to contact me or my Tanya Cosford (Tcosford@davidlock.com) so that these issues may be resolved to ensure that the application can be progressed and approved without delay.

Yours sincerely,

S.Wood
