Full Comments

Further to the comments I made in respect of the pre-application enquiry (S/PMIN/24/0421), the applicant has amended the scheme for this submission broadly in line with the concerns I raised. There is a much greater distinction at the respective landscape gateway areas and a significant improvement in species selection for site-specific areas. Overall, the landscape scheme affords a much better dovetailing with the character area design code. In that regard, I am satisfied that the applicant has addressed my concerns at the pre-submission stage.
