Transport Development Management

Memo

To: Planning Services
From: Transport Development Management
Date: 21st January 2022

Application Number: S/COND/21/1998

Proposal: Discharge of condition 6 (Phasing Details) from previous outline permission S/OUT/13/1555.

Location: Land North Of A420 Eastern Villages

Ed,

I refer to the above application.

Condition 6:
Prior to the submission of the first reserved matters application, a phasing plan shall be submitted to and approved in writing by the Local Planning Authority to show how the development shall be implemented in phases. The phasing plan shall include the following elements:
a) The development phases;
b) Major distributor roads/routes within the site, including a defined hierarchy of the road network,
c) Phased access strategy delivery and associated phased housing delivery;
d) Pedestrian / cycle connectivity to committed and emerging parcels of development within the New Eastern Villages;
e) Local centres and community facilities;
f) Strategic foul and surface water features and sustainable drainage systems; and,
g) Strategic landscaping, recreation and open space.
The development shall be carried out in accordance with the approved phasing plan.

Figure 2 is shown within a portrait A4 document and therefore is small, it is difficult to determine some of the items shown and awkward as some of the colours and markings shown are very similar despite them showing different things, the Section C Secondary Street and Land Drainage Channel for example. A greater distinction in colours and patterns use on a larger plan would assist in providing clarity.

There are a number of instances where provision of infrastructure is dependent on third parties, where the infrastructure 'could' be delivered, this lacks commitment as to when the infrastructure will be provided and does not provide sufficient certainty of when infrastructure will be provided.

a) The proposed development phases have been illustrated in Figure 1, however, phase 1 and phase 4 appear to be reversed from recent discussions with developers. Whilst this is not an objection, it is likely to result in a long haul road which may impact on delivery of other infrastructure such as Public Open Space.
b) Major distributor roads/routes are not mentioned but Primary and Secondary Streets are. No other street types are mentioned. There is a gap between provision of the secondary loop road in Phase 1 to the finish at Phase 4, turning facilities will need to be provided at the end of the loop road during Phase 1 to address the lack of complete provision of the loop road, in accordance with Condition 25 of the outline consent.

c) Some mention has been provided of phased access strategy and housing delivery, but it is not clearly presented within the document and no details of direction of build is included.
d) Footpath/cycleway are described as provided between 3.5-4m in width which is not compliant with the requirements of LTN1/20 and is therefore not acceptable. Footways and cycleways need to be segregated, except in leisure scenarios.
e) Local centres and community facilities are included in the document but other colleagues will be better placed to comment on their suitability.
f) Please consult our LLFA colleagues on this aspect.
g) Please consult our Landscaping colleagues on this aspect.

Please note that the comments made here represent Officer opinion and cannot be seen to prejudice Swindon Borough Council's formal determination in relation to any application or planning matter.
