Swindon Borough Council
Planning Department
16 MAR 2017

Mr P Hayes
Lower Copse
Shrivenham Road
South Marston
Swindon
Wiltshire SN3 4RT

Richard Bell
Head of planning

10-03-2017

Application Number 1-03-2017
No S/001/13/1555

1/ The outline planning should be refused for what I was able to see with short meeting with Mr E Snook fails on.
Highway layout without reference to A420 congestion which is already reached saturation point several times of every day

2/ Drainage problems not covered there is no major sewage provision that is also the case with N.E.V. presentation by S.B.C. planning department leaving the developments with Major Health risks.

Surely outline submissions should at inception address the above points which for South Marston is inadequate.

Highway and Major routes it is not good enough to comment in the N.E.V. draft standards may not be adopted, which has already been disasterous across the Swindon area previously.
The drainage system (SUDS) is all very well but where is a new sewage works. These should be clearly defined and fully funded before any further development takes place, as previously mentioned by me. The comment that would be Thames Water to provide solutions. I could give you instances having previously been

a councillor where they just pass through development presumably hoping they and their staff would have retired before problems occur. I will just mention one at a meeting called by S.B.C. with Vickers, Thames Water and residents concerning flooding and the failure of ballancing ponds until at my insistance Vickers board met me and rectified the problem.

Yours Sincerely,

[redacted]

P HAYES
