Dear Swindon Strategic Development team,

Ref your letter S/RES/24/3020/EIDSN dated 10 Sept 2024, please find below our concerns and comments in relation to the planning application S/OUT/13/1555:

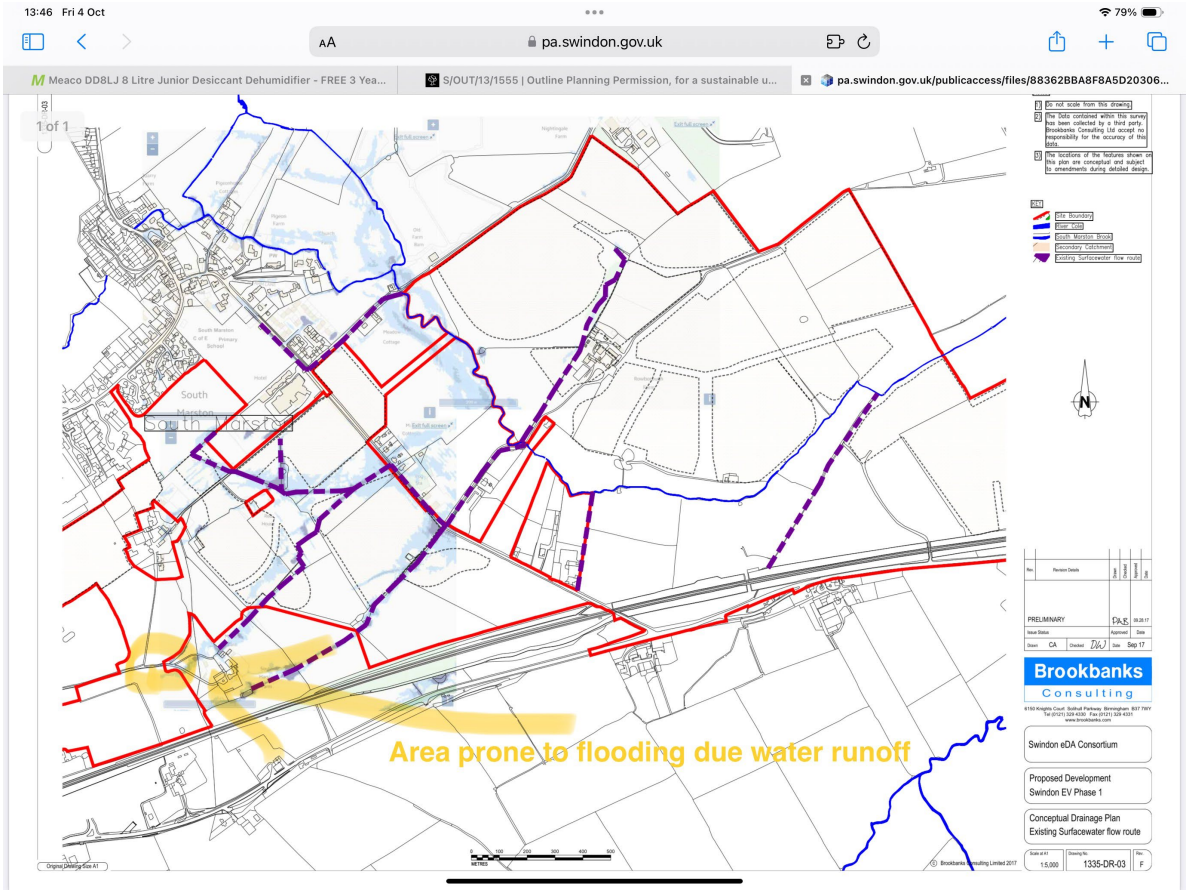
1) The four houses centred around SN3 4FX have their water supply served via a long pipe running from the stop cock on Old Vicarage Lane (opposite house called Fairview) and running underneath the planned housing development. What are the developer's plans for:
A) ensuring that this pipe is not damaged during the house / road building projects?
B) ensuring there is no interruption to the water supply to the 4 homes during the project?
C) Ensuring routine maintenance access to the full length of the pipe is possible, without undue difficulty, once the development project has completed ?

2) How will the construction of the new road across Morses Lane be organised so that 24/7 access can be maintained to the 4 homes at the end of Morses Lane?

3) There are already flooding issues at the eastern end of Morses Lane due to run-off from tarmac surface and the fact it gently slopes to the East, allowing water to overwhelm the small ditch and permanently blocked drain (east of junction with Sandy Lane and running up to the end of the adopted road - see attached screenshot). What plans do the developers have to accommodate the significant increase in water run-off potential of the new road and ensure that the area indicated on the attached screenshot will not flood in the future e.g. soakaways / other drainage solutions ?

4) Will the new road also have new utilities running long it that might benefit our homes at the end of Morses Lane e.g. fibre internet, mains gas, mains sewage etc?

Please feel free to contact us at the above email or mobile

Kind regards


The Cheese Room
