Transport Development Management

Memo

To: Planning Services
From: Transport Development Management
Date: 31st August 2022

Application Number: S/COND/22/1186

Proposal: Discharge of condition 30 (Old Vicarage Lane) from previous permission S/OUT/13/1555 - Outline Planning Permission, for a sustainable urban extension to the east of Swindon and north of the A420 of up to 2,380 dwellings together with a mixed use local centres/areas (including A1 retail up to 1,500 sq metres, services (A2), restaurants, pubs and takeaways (A3, A4, A5), business uses (B1) up to 1,000 sq metres, residential); community uses (D1); sheltered and/or care accommodation (C2/C3); two primary schools; green infrastructure including formal (including playing fields) and informal open space, landscape, biodiversity and amenity space; play space (including NEAPS/LEAPS/MUGAS); changing and sports facilities (including D2) and ancillary retail uses; sustainable drainage systems; highway, cycle and pedestrian routes; car parking; infrastructure (including utilities); engineering works including ground remodelling; demolition, site reclamation and removal of structures; the formation of new accesses from the A420, Old Vicarage Lane and Thornhill Road.

Location: Land North Of A420, New Eastern Villages

Ed,

I refer to the recent submission in relation to the above application.

Condition 30: Old Vicarage Lane
Notwithstanding the submitted details on Drawing 1335-HL-59C (submitted to LPA on 13th October 2017) prior to commencement of any dwelling in South Marston served by the OVL priority junction, detailed design of the OVL priority Junction access proposals serving South Marston, shall be submitted to and approved in writing by the Local Planning Authority. The access proposals will be supported by Stage 2 Road Safety Audit and Non-motorised User Audit and will directly consider the vehicle and pedestrian access requirements of adjacent properties, including turning of vehicles and road crossing, through both construction phase and operational phase. Prior to first occupation of any dwelling within South Marston, the OVL priority junction will be completed in all respects in accordance with the approved plans and maintained as such thereafter to serve the development.
Prior to commencement of any dwelling in Rowborough, detailed design of the OVL Junctions (northern and southern access - Plan 1335-HL-57J (submitted to LPA on 13th October 2017)) to Rowborough, shall be submitted to and approved in writing by the Local Planning Authority. The access proposals will be supported by Stage 2 Road Safety Audit and Non-motorised User Audit and will directly consider the vehicle and pedestrian access requirements of adjacent properties, including turning of vehicles and road crossing, through both construction phase and operational phase. Prior to first occupation of any dwelling at Rowborough, the access proposals in relation to the northern access will be completed in all respects in accordance with the approved plans and maintained as such thereafter to serve the development. Prior to first occupation of the 300th dwelling at Rowborough, the access proposals in relation to the southern access will be completed in all respects in accordance with the approved plans and maintained as such thereafter to serve the development.
Reason: to ensure safe and sufficient access proposals are provided through construction and operational phases of development, to consider existing highway users, development occupiers and adjacent residents in interests of highway safety and in compliance with Local Plan Policy TR1 and TR2.

The submitted details are noted, albeit that the specified RSA2 and NMU appear absent from the submission.

Once Technical Approval has been issued for the S278 agreement works, the same drawings and letter of Technical Approval will need to be submitted to comply with the operational part of this condition.

The drawings appear to detail future (operational) access arrangements for neighbouring properties in the form of existing driveways, what is not clear, and also required by the condition, is how access to these neighbouring properties will be accessed during construction.

A means of preventing vehicle access along the whole length of the existing section of Old Vicarage Lane that will no longer be required for vehicle use, such as bollards, are required immediately to the north of the proposed pedestrian and cycle crossing and to the south of the proposed access to the existing dwellings. The vehicle proof barriers must maintain access for non-vehicular traffic.

The application form refers only to compliance of condition 30, the CEMP may need to be submitted separately under condition 36 for part compliance.

The illustration of the haul road route on page 5 of the CEMP appears to show the haul route to the rear of the proposed compound area, it is therefore unclear how vehicles will access the compound.

The compound appears small for both the OVL junctions with SM & Rowborough and the OVL A420 works. The compound appears acceptable for the non-A420 works.

The CEMP will need to be updated in accordance with comments made previously.

As currently submitted the details are insufficient to comply with this condition.

Please note that the comments made here represent Officer opinion and cannot be seen to prejudice Swindon Borough Council's formal determination in relation to any application or planning matter.
