Case Description: Discharge of condition 6 (Phasing Plan) from previous outline permission S/OUT/13/1555.	**Planning Ref**: S/COND/21/1998	
	Case Officer: Ed Snook	**UD Officer:** PG
Site: Land North of A420, Eastern Villages, Swindon	**Relevant Policies**: DE1, DM1, NPPF	
	Date: 28 January 2022	
Advice relating to NPPF, National Design Guide, Swindon Borough Local Plan Policy DE1 and Adopted Residential Design Guide SPD.		
Scheme recommended to Design Review Panel https://www.designreviewwest.org/		-

A - Summary	Complies	-	Conflicts	-	Changes Needed	-

Exec Summary	This condition relates to the proposed phasing for the S. Marston expansion area and the Rowborough urban extension, forming the northern section of the New Eastern Villages development. My concern with the proposal lies with what is proposed for 'phase 1' which includes early provision of the strategic primary road that is set to run through the area called 'South Marston West', the residential development parcels which are proposed to be delivered at 'phase 4'. The reason for my concern is that the primary street has an important place-making function in the grander scheme of the development and would need to be delivered in a way that supports the residential character required of such a street, particularly where it is located within the housing parcel at S. Marston West. Leaving the 'detail' of this aspect to later phases of the development at phase 4 can potentially lead to a very constrained series of housing parcels along its length leaving very few options to deal with, one of them being land parcels that are heavily constrained by their options for vehicular access. This can also lead to uninterrupted and protracted block lengths that compromise the future development's permeability. Delivering a street with such a strategic function through the parcels that allocated as new residential areas that represent the western expansion of S Marston needs careful attention in order to achieve the wider placemaking objectives of the NEV.

These comments are not exhaustive but hope they are useful. I am happy to discuss any of these.
