Dear Ed,

RE: RESERVED MATTERS APPLICATION FOR FOUL WATER PUMPING STATION PURSUANT TO OUTLINE PLANNING PERMISSION S/OUT/13/1555/EDSN

On behalf of our client Vistry and Taylor Wimpey (VTW), we are pleased to submit to Swindon Borough Council a reserved matters application (RMA) pursuant to the outline planning permission S/OUT/13/1555/EDSN. The formal description of this reserved matters application is as follows:

> *Reserved Matters application (following planning application S/OUT/13/1555) for Land North of A420, Eastern Villages. Details of the layout, scale, appearance, access and landscaping in relation to a foul water pumping station within South Marston.*

This application includes the following documentation submitted via the Planning Portal, under reference **PP-13044248**:

- This covering letter
- Arboricultural Assessment (ref: 1796 AA - Rev A)
- Surface Water Drainage Technical Note (May 2024)
- LEAMP (May 2024)
- Drawings:
  - FWPS Site Location Plan (ref: LHL006_220)
  - FWPS Landscape Plan (ref: 1796-L-120-P03)
  - FWPS Layout Plan (ref:1335-S278-OVL-SK-130 Rev D)
  - FWPS Visibility Splays (ref: 1335-S278-OVL-SK-132 Rev A)
  - FWPS Details Plan (ref: 1335-S278-OVL-SK-133)

Context

Outline planning permission S/OUT/13/1555/EDSN, was approved by Swindon Borough Council on 11 August 2021, for a sustainable urban extension to the east of Swindon and north of the A420.

This application is the first in a suite of infrastructure application that will be submitted to Swindon Borough Council and follows the approval of the site wide foul water drainage strategy (ref: S/COND/22/0886). The position of the proposed pumping station within this application accords with the location shown in the approved strategy.

Proposed Development

In summary the proposed development included as part of this RMA includes:

i. Construction of a foul water pumping station, required to service the initial phases of residential development of Woodlands, including the expansion of South Marston;
ii. A new access off Old Vicarage Lane, providing future access for services; and
iii. Associated hard and soft landscaping, drainage, construction access, engineering operations and earthworks.

Foul Water Pumping Station

The foul water pumping station will connect to the first residential units which form the expansion of South Marston - providing necessary sewerage connections for the first phases of residential development. The network of additional sewer pipes will be required to enable the foul water to connect to the pumping station, which will come forward as part of a future application. The pumping station will be located underground except for the control kiosk, the site will be bounded by a palisade fence.

Access

A new minor T-junction is proposed, off Old Vicarage Lane and located to the to the north of The Carpenter Arms car park access. The new junction will provide direct access to the pumping station for future services and maintenance and will include a turning point as part of the vehicle crossover to enable users to safely turn before exiting back onto Old Vicarage Lane.

Drainage

The proposed access will be formed of a permeable grasscrete, which will allow water to filtrate through the proposed surface, thereby retaining the existing drainage flows. The pumping station will have a concrete slab base, sloping towards the eastern edge where a filter drain will be installed to collect surface water run-off. The run-off will then be conveyed to the adjacent swale (see approved Surface Water Drainage Layout Plan (ref: S/COND/22/0711)), eventually merging into the outfall in Rowborough.

Landscaping

The pumping station will have native woodland edge planting on the east and west boundaries, which will connect to future woodland planting along the wider site's boundary to the existing rail line. The entrance to the pumping station will be planted with a native species rich hedgerow to offer additional screening. Further landscaping includes a mixture of grasses (including amenity and wetland grass mixes) which surround the proposed new access and vehicle crossover. The landscaping has been designed to complement the wider landscape strategy as approved in the Strategic Design Code (ref: S/COND/22/0031).

The application has been supported by the requisite fee (£318.00), paid via the Planning Portal.

We trust that these documents provided will ensure the validation of this planning application, however, if you require any further information, please do not hesitate to contact me or my Tanya Cosford (Tcosford@davidlock.com) so that these issues may be resolved to ensure that the application can be progressed and approved without delay.

Yours sincerely,

S.Wood
