Transport Development Management

Memo

To: Planning Services
From: Transport Development Management
Date: 27th January 2026

Application Number: S/COND/25/0347

Proposal: Discharge of Conditions (11) LEAMP (13) Tree Protection (17) Bats (29) Road Link Design Details (31) Movement Phasing Plan (36) Construction Method Statement (37) Construction Environmental Management Plan (42) Surface Water Drainage (53) Slab Levels (54) Materials (56) Street Lighting & Furniture from previous application S/OUT/13/1555.

Location: Land North Of A420, Eastern Villages, Swindon

Thank you for re-consulting Highways & Transport on the above application to discharge several planning conditions, imposed on the grant of permission in August 2021, for the strategic mixed-use development of land north of the A420, forming part of the New Eastern Villages (NEV) urban extension.

Since my previous consultation response dated 26th August 2025, an updated Movement Phasing Strategy (dated December 2025) has been submitted to support the discharge of Condition 31.

Following review of the previous iteration of the Strategy, I recommended that Condition 31 should not be discharged, pending resolution of issues concerning the realignment of Old Vicarage Lane, and the proposals for the western section of Morses Lane.

Condition 31:
Prior to commencement of works within each sub-phase of development, details of a phasing strategy for the 'Indicative Access and Movement Plan' (LHL005 / 162a P Apr 2019) movement framework within that sub-phase shall be submitted to and approved in writing by the Local Planning Authority. The 'movement phasing strategy' shall illustrate how existing and proposed cyclepath/footpath including Public Rights of Way will be maintained open for the pass and repass of the general public through phased construction works of each sub-phase or parcel and details of when each planned new cyclepath/footpath will be delivered to serve development parcels and to provide connections leading to infrastructure provisions in the wider New Eastern Villages and coordinate with their delivery. Infrastructure provisions to be considered shall include Primary and Secondary schools, planned local centres and the District Centre. Each planned new cyclepath/footpath shall be delivered in accordance with the 'movement phasing strategy' to a geometric and construction specification submitted to and approved in writing by the Local Planning Authority. Notwithstanding the above, the section of the foot/cycle way between Old Vicarage Lane and public right of way 5 (at junction with railway crossing) (as referred to on Swindon Borough Council's Definitive Map) shown indicatively dashed pink on 'Indicative Access and Movement Plan' (LHL005 / 162a P Apr 2019) shall be completed prior to 300th occupation.

Reason: to ensure safe and sufficient sustainable access proposals are provided through construction and operational phases of development, to consider existing highway users, development occupiers and adjacent residents in interests of highway safety and in compliance with Local Plan Policy TR1 and TR2.

Old Vicarage Lane (OVL) Realignment

In accordance with the outline planning permission, the priority junction must be provided prior to occupation of the 1st dwelling which takes access off OVL, and as such, will form part of the first phases of development at South Marston. As shown in Figure 4, the new junction will provide a new pedestrian and cycle access to the Carpenters Arms Pub, a new route and connection to PRoW SM15, and a 3.5m shared footway/cycleway route and connection to Bridleway 8. Junction spurs into the future Rowborough development are also provided as part of the OVL priority junction works and are shown to accommodate future pedestrian and cycle network which will be delivered alongside the primary street carriageway within Rowborough.

The submitted details and proposed delivery timeframe are considered acceptable.

Section of Primary Street within Residential Parcels (Marston Gate and Nightingale Corner)

Reserved matters approval for the Primary Street was granted under application ref: S/RES24/1020 on 25th July 2025. Section 3.11 of the updated Strategy confirms that a temporary footpath will be provided along the northern side of the Primary Street to maintain pedestrian connectivity to the existing bridleway to the north.

The submitted details and proposed delivery timeframe are considered acceptable.

Primary Street through parkland to Thornhill Road

Reserved matters approval for the western section of the Northern Loop Road was granted under application ref: S/RES/25/0836 on 18th December 2025. As a result, the previous concerns regarding pedestrian segregation between the Primary and Secondary Streets have been satisfactorily resolved.

The submitted details and proposed delivery timeframe are considered acceptable.

Thornhill Junction

This section of the Strategy remains unchanged. As previously advised, additional mitigation measures may be required at later phases to manage risks associated with the interaction of residential and construction traffic.

The Local Highway Authority raises **no objection** to the discharge of Condition 31.

Please note that the comments made here represent Officer opinion and cannot be seen to prejudice Swindon Borough Council's formal determination in relation to any application or planning matter.

Kind Regards,
Chelsey
