Nightingale Wood
Partial Discharge of Condition (9) Design Code from previous application S/OUT/13/1555 feedback

Dear Ed

Thank you for inviting us to comment on the application (partial discharge of condition 9 – Character Area Design Code from previous application S/OUT/13/1555) feedback sent on 3rd December.

Although we note that this document is a high-level design code, we note the following:

- A potential new access to our site is indicated in the location we suggested to connect to a new car park, but it is not labelled or included in the body of the text as a 'vehicular' access.
- No further detail has been given to support how the integrity and security of our boundary is to be maintained.
- Lastly, we presume this is a typo, but one which is repeated, is the description of proposed planting on our boundary as 'native woodland essence'. Not clear what this is.

Forestry England are keen to work with developers and other stakeholders to finalise plans as we note that development is getting ever closer with work now taking place in Nightingale Lane.

Kind regards

C Hayes (signed digitally)
