Full Comments

It appears that there are no landscape / mitigation proposals included with this actual submission.

There is a loss of trees and a loss of hedgerow, but it appears that they are all being dealt with under the broader answer 'there is lots of mitigation measures elsewhere on the wider site'.

I find this unsatisfactory as each application ideally needs to be 'self-sufficient' in that if it is causing damage / harm in any way, then the mitigation / compensation measures should also be contained within the application ?

Overall therefore, this application is not acceptable in its current format.
