1.0 INTRODUCTION

Context

1.1 This Phase 1: Open Space Strategy has been produced by FPCR Environment and Design Ltd. on behalf of Vistry and Taylor Wimpey (VTW).

1.2 The Open Space Strategy is for the development at South Marston and Rowborough, in the context of, and with reference to, the wider Eastern Villages development site (planning reference S/OUT/13/1555).

1.3 An Open Space Strategy is required prior to the submission of the first Reserved Matters Application on each Phase, or as part of the first Reserved Matters Application for that Phase.

1.4 This Open Space Strategy relates solely to land within Phase 1, South Marston East as shown in 'blue' below from the Phasing Details (June 2023).

Figure A: Phases of the Development

(Extract from, Land North of the A420, South Marston and Rowborough, NEV, Swindon Condition 6 of OPP OUT/13/1555, Phasing Details, June 2023 update)

2.0 REQUIREMENTS

Section 106

2.1 The submission of a strategy for the design provision and laying out of the Open Space is in accordance with the specification under Part B, Appendix 6, of the s106, which states the following:

"The Open Space Strategy shall contain details of the following:

1. Location and quantity of each type of open space being provided on site within each Phase:

a) general recreation

b) Formal Children's Play - LEAPs and NEAP and their location

c) Allotments

d) SuDs/Drainage elements

e) Outdoor Sports

f) environmental constraints

g) Community Forest/woodland planting

2. Proposed future management and ownership of the open space

3. Arrangements for ensuring that the Management Company or Management Entity are provided with a full pack of information about the Open Space to be transferred to the Management Company or Management Entity prior to its transfer which for the avoidance of doubt must contain the most- up-to date Institute of Play Inspectors International Inspection Certification for the LEAPs and NEAPs integral to that specific transfer including all post construction and regular inspections prior to transfer as built plan drawings Health and safety file from CDM Regulations surveys/utilities

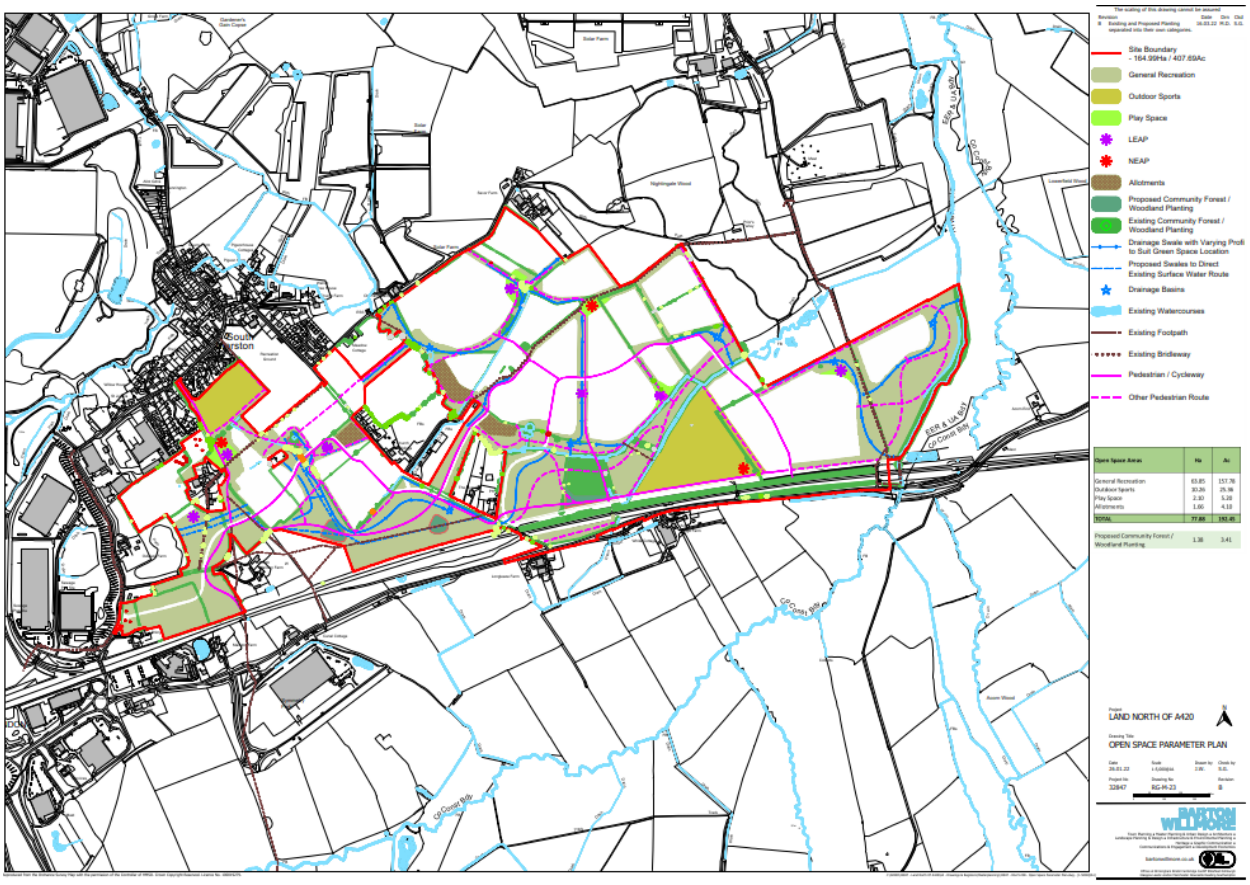
4. Management of drainage elements associated with the SuDS infrastructure contained within the relevant open space

5. Detailed schedule for future maintenance standards of all open space (and sports hub if applicable).

3.0 PROVISION

Location and quantity of each type of open space

3.1 As required by the Section 106, a site wide Open Space Parameter Plan has been prepared (see below). The Open Space Parameter Plan identifies the different open space types and the location of each type across all phases.



3.2 The following summarises the open space types and provision within Phase 1, South Marston East

Table 1

Phase 1 South Marston East Open Space Type	Provision & Location	Commentary
Play Space	**1 LEAP (L2)** *L2 located west of Old Vicarage Lane*	Local equipped areas for play. (Minimum activity zone of 400m2)
Allotments/ **Community Orchard**	**Allotments (A1)/Community Orchard** *Land adjacent to Old Vicarage Road*	Comprises land for allotment/community orchard provision
General Recreation	*Around the built development parcels and primarily within the southern part of Phase 1*	Green infrastructure to include retained habitats, areas of new planting (woodland, hedgerows and individual trees); grassland creation, surface water drainage (swales and basins), existing rights of way and new recreational routes

Phase 1 South Marston East Open Space Type	Provision & Location	Commentary
Community Forest/Woodland Planting	*Located within General Recreation Area*	New native woodland and tree planting.
Woodland Edge/Scrub	*Located within General Recreation Area*	New native woodland edge/scrub mixes.
SuDS Drainage Basins and Swales	*Located within General Recreation Area*	Drainage basins and swales providing drainage and ecological benefits

Design Principles

3.3 The Strategic Design Code (SDC) provides the design intentions for the open space elements within Phase 1. Reserved matters applications for landscape will follow the guidance within the SDC.

Play Space

3.4 The design of the equipped play space will be in accordance with relevant good practice guidance to include, for example, Planning for Design & Outdoor Sport & Play (Fields in Trust).

LEAP (L2)

3.5 The Locally Equipped Area of Play is an area of open space specifically designated and laid out with features including equipment for children who are beginning to go out and play independently close to where they live will be primarily for younger children.

3.6 The LEAP will be designed to provide a stimulating and challenging play experience with a minimum of six play experiences (equipment). Equipment will be chosen to provide opportunities for balancing, rocking, climbing, overhead activity, sliding, swinging, jumping, crawling, rotating, imaginative play, and social play.

3.7 The LEAP will comprise a minimum activity zone of 400m2. A buffer zone of 10 metres minimum depth normally would separates the activity zone and the boundary of the nearest property containing a dwelling. A minimum of 20 metres would normally be provided between the activity zone and the habitable room façade of the nearest dwelling.

3.8 Self-closing gates, seating, and litter bins will be provided together with signage (e.g. indicating the area is for children's play and dogs are not welcome, contact details of facility operator and location

of the nearest telephone). Boundaries to the LEAP would be well defined and recognisable by landscape and or fencing treatment.

Allotments (A1)/Community Orchard

3.9 An area of land is provided for the provision of allotments/community orchard for the local and wider community.

General Recreation

3.10 This comprises retained habitats (e.g. trees, hedgerows and grassland), areas of new planting (e.g. Community Forest & Woodland Planting, woodland scrub/edge planting, hedgerows and individual trees); grassland creation (e.g. wildflower meadows, wet grassland area), and SuDs, (surface water drainage basins and swales). The design will focus on delivering native species that are common to this landscape, with a mix of plant types and grassland habitats to maximise biodiversity benefit. The design should ensure that the General Recreation area is multifunctional in that it offers, for example, benefits for biodiversity, landscape, recreation and health and well-being, and adaption to climate change.

4.0 MANAGEMENT & OWNERSHIP

Proposed future management and ownership of the open space.

4.1 It is expected that all of the Phase 1 Open Space types will be managed by a Landscape Management Company.

5.0 MANAGEMENT TRANSFER

Arrangements for ensuring that the Management Company or Management Entity are provided with a full pack of information about the Open Space to be transferred to the Management Company or Management Entity prior to its transfer.

5.1 There will be appropriate mechanism in place between Taylor Wimpey and Vistry, and the Landscape Management Company as part of the transfer of the Open Space to the Landscape Management Company. This will include providing relevant information to the Landscape Management Company on the Open Space prior to its transfer.

6.0 MANAGEMENT – DRAINAGE ELEMENTS

Management of drainage elements associated with the SuDS infrastructure contained within the relevant open space.

6.1 It is expected that the Phase 1 SuDS basins and swales will be managed by the Landscape Management Company.

7.0 MAINTENANCE

Detailed schedule for future maintenance standards of all open space

7.1 All Open Space types will be monitored by the Landscape Maintenance Contractor to allow for an appropriate refinement of the following maintenance regime which provides general maintenance standards.

Description of works General Maintenance Standards	Years Active					
	1	2	3	4	5	6+
Play Space						
Regular inspection of play equipment and a general maintenance check/record of all equipment, surfacing, fencing, furniture, gates and associated fittings, nuts, bolts and plugs. Particular attention should be paid to the safety of the play features, with all fixings and platforms secure and all individual play equipment sound and operational.	√	√	√	√	√	√
Regular litter clearance and sweep of the area should be undertaken. This will include emptying of any litterbins and the removal of litter, glass, stones, and any other debris from the play surfaces.	√	√	√	√	√	√

Description of works General Maintenance Standards	Years Active					
	1	2	3	4	5	6+
Allotments/Community Orchard						
Regular inspection and on-going general maintenance of the facility.	√	√	√	√	√	√

Description of works General Maintenance Standards	Years Active					
	1	2	3	4	5	6+
General Recreation						
Existing Trees/Woodland Inspect trees/woodland annually and after storms. Undertake any resultant scheduled tree works outside of the bird breeding season as appropriate. Retain or remove arisings as appropriate	√	√	√	√	√	√
Existing Hedges Cut once annually in winter after fruiting on a rotational basis, i.e. 50% of hedges cut on year, the remainder cut the following year (outgrown hedgerows to be cut back to prevent overhanging of adjacent land uses where applicable). Remove arisings from site.	√	√	√	√	√	√

Description of works General Maintenance Standards	Years Active					
	1	2	3	4	5	6+
Community Forest/Woodland Planting/Woodland Edge/Scrub Planting						
During establishment ensure a 500mm radius around each tree is kept weed and grass free, inspect plant protection regularly and adjust or replace where damaged.	√	√	-	-	-	-
Remove tree protection once plants have established.	-	-	√	√	√	-
Carry out selective thinning, periodically to establish healthy, diverse woodland.	-	-	-	-	√	√
Inspect trees annually and after major storms. Undertake any resultant scheduled tree works outside of the bird breeding season as appropriate. Prune as required to achieve healthy growth and natural shape. Retain or remove arisings as appropriate.	√	√	√	√	√	√
Amenity (short mown) Grassland Types						
During establishment mow only when the grass reaches 75mm height and cut to 40mm. Remove arisings from first mow only.	√	√	√	√	√	√
Cut once monthly (March-October) to 50mm or lower. Distribute arisings evenly.	√	√	√	√	√	√
Meadow (longer) Grassland Types						
Control weed growth in year 1. 4 cuts in year 1 (March and again late May, and again September/October.) Cut to 50mm. Remove arisings by day 10.	√					
2 cuts per year. 1 cut late in March and 1 cut September/ October. Sward height 50mm. Remove arisings by day 10.		√	√	√	√	√
Re-sow worn patches and treat weeds with a suitable herbicide as required.	√	√				

Description of works General Maintenance Standards	Years Active with Priority					
	1	2	3	4	5	6-20
SuDs Drainage Elements						

Description of works **General Maintenance Standards**	**Years Active with Priority**					
	1	**2**	**3**	**4**	**5**	**6-20**
General maintenance checks at regular intervals to check for any blockages/debris/fly tipping, which may affect or impede water flows. Large fly tipping items should be removed as soon as possible.	√	√	√	√	√	√
