Dear Ed,

Please see attached for an updated Arb Impact Assessment in response to the comments received from Jonathon Lynch in regard to the ecological aspects of application S/COND/23/0154, specifically the Arb impact Assessment an CEMPMS.

Arb Impact Assessment
Paragraph 6.3 of the report now states '*Mitigation for the loss of tree stock as part of this application will see a 1:1 replacement using Heavy Standard (12-14cm) tree stock. This will include a total of three new trees planted as part of the future Public Open Space RMA to the east of Old Vicarage Lane and the north of the train line. Mitigation for the loss of hedgerows will also be included within the POS through the creation of new hedgerows at a 1:1 ratio, totalling 80m of new hedgerow.*'

In addition to the wording provided the tree retention and tree protection plans also include an area shown to be for the proposed mitigation planting.

CEMPMS
The concerns raised by the officer is that the ecological points are appended to the CEMP, however this has been the case with all other submissions including the primary street, wherein the issue has not been raised, and has subsequently been approved (ref: S/COND/25/0347).

As such we have not submitted an updated CEMP or a standalone report.

We trust that this addresses all outstanding comments, and this application can now be positively determined.

Kind regards
Sam
