Subject: Planning Application Number S/OUT/13/1555

With regard to the above Planning Application I would like to register our views.

Housing

Why is there a need for 500 dwellings to be built in South Marston when it appears that Rowborough is a completely new development and could absorb those dwellings. Why is there a need to expand South Marston?

Is the hotel being sold to developers? Is an alternative location for a leisure centre being proposed by the developers?

Roads

The link road through the new houses will degenerate into a rat-run through to the Key Point exit by Rowborough traffic. The two arterial roads coming out of Rowborough should be reduced to one and should meet Old Vicarage Lane nearer to the A420. This will deter vehicles using Old Vicarage Lane as access to the village then on to Key Point. The road running parallel with Rowborough Lane should not extend to Old Vicarage Lane but follow the development boundary to meet the other new road.

Confirmation by the developers of developing the tunnel from Rowborough must be contractual.

Schools

Plans for the existing school to be extended will negate any benefits that new roads may offer. With pupil numbers set to increase the extra traffic using Old Vicarage Lane will be severe. Old Vicarage Lane is a narrow 'lane' and is not designed to cope with those levels of traffic. Drivers that drop their children off will then use the village as their route to Key Point. As schools have fixed start and finish times the amount of traffic looking for parking/stopping points at those times will be horrendous.

The design of the proposed extended school is atrocious. It resembles a scene from a Lowry painting and is not in keeping with the Victorian building already there.

Why can't a school be built as part of the development where pick up/drop off points are catered for in a safe way without blocking local traffic? An alternative solution has been suggested that accommodates all the facilities required of a thriving school but in a safe environment. Surely, the planning committee want to see a development that is safe and beneficial to the community, especially young children.

Recreational Area

The 'Rec' is a well used space by all of the community. It also accommodates pitches for local teams which, in turn, generates revenue for the council. It is a place to walk especially for the more senior members of the village.
