Dear Sir/madam

Ref Outline Planning Application S/OUT/13/1555.

Proposal: Outline planning permission for up to 2,380 dwellings, mixed use local centres/areas, community uses, sheltered and/or care accommodation, up to two primary schools, green infrastructure including formal and informal open space, play space, sports facilities, sustainable drainage, engineering works and including ground re-modelling, other infrastructure, demolition and the formation of new accesses from the A420, Old Vicarage Lane and Thornhill Road.
Location: Eastern Villages North, Eastern Villages, Swindon.

Objection/comments:

1.0 Access roads:
Comment: The access onto Old Vicarage Lane at the tee junction after the island feed from Rowborough development should be a restricted feed to traffic entering the existing village.

Reason: Traffic from the Rowborough development may use this route and cause problems at Pound Corner. Residents have constantly put forward the view that a large increase in traffic volume is not suitable for our existing village road environment and will increase the present safety risk.

2.0 Objection: The end section of the new road from the South Marston proposed development onto Thornhill Road should be moved from its current location.

Reason: There is no reason that the road access onto Thornhill Road should not be sited between Oxlease Farm and the Thornhill industrial site. This route is a short route directly into the proposed development. Also when the brownfield site (Thornhill industrial site) is developed it will create a sensible access onto Thornhill Road for that development. About half of the proposed route on the plan is through a non-developed area. This will give developers an opportunity to propose development along both sides of this road in the future. If the developers proposed

route is approved a covenant should be imposed to ensure and protect that no development will be allowed on this undeveloped green space.

3.0 Comment: Access east of Old Vicarage Lane from the Rowborough development onto the A420 through a tunnel under the railway to be in place before any house building is started.

Reason: At present it is difficult at times to access the A420 both at Old Vicarage Lane and at Gablecross junction. The improvement to the junctions may improve this but will only become a greater problem if no second direct access onto the A420 is provided east of Old Vicarage Lane. If housing development proceeds an increase in traffic will occur through the new South Marston development and through our existing village centre.

Yours sincerely
